What some of our subscribers said about us:

“As compared to the reports provided by the other investment houses, your reports provide a much greater coverage and depth. For individual investor such as myself, to invest intelligently requires a good knowledge of the company fundamentals and prospects, its history, future plans and present conditions. Your reports gave a very good coverage of the companies’ quantitative as well as the qualitative aspects.” – **Jake Chng**

“The straight forward presentation of fundamental data of a company and the technical aspects is very good. So far, no other investment analyst has done so well. **Credit be given to you guys who are willing to listen to feedback and make SIAS Research report reading a breeze.**” - **Lynn Tan**

“Thank you for reminding me of last Friday’s talk at the HDB Hub. It was my first attendance and I must say it was fantastic especially your presentation. I am happy that I sacrificed a night’s out with friends to attend the talk. It is well worth it.” – **Ang Yew Lee**
